Template 03 — Digital & IT | Worked Example (fictional student)

This is a fictional example showing what a realistic — not aspirational — student CV looks like in this sector. Names and details are made up.

Priya Nair

London, UK | 07700 900 388 | priya.nair@email.co.uk

PERSONAL PROFILE

Year 13 student at Hackney Community College studying IT, Computer Science and Business. Passionate about technology and digital problem-solving. Looking for an IT support apprenticeship or entry-level digital role where I can build on my technical skills and gain hands-on experience with real systems and networks.

EDUCATION

Hackney Community College | 2022–2024

BTECs (in progress): IT (Distinction track), Business

Previous: Stoke Newington School | 2017–2022

GCSEs: Computer Science A (8), Maths B (6), English Language B (6), Science B (6), Art C (5)

WORK EXPERIENCE & VOLUNTEERING

IT Volunteer — Stoke Newington Library Digital Drop-In | September 2023–Present

- Helped adults troubleshoot basic IT issues including email, printing and internet access
- Explained technical processes in simple, clear language to non-technical users
- Logged recurring issues to help staff identify patterns and improve sessions

School IT Helper — Stoke Newington School | 2021–2022

- Supported the IT technician with setting up classroom equipment and resolving basic faults
- Assisted classmates with software and hardware issues during lunch hours

SKILLS

Technical Skills: Windows 10/11, Google Workspace, Microsoft Office, basic HTML/CSS, Python (school-level), troubleshooting hardware and software faults

Other: Fast learner with new software; comfortable explaining tech to non-technical people

ACHIEVEMENTS & INTERESTS

Achievements: Completed Google Digital Garage: Fundamentals of Digital Marketing (free certification); Built personal website using HTML and CSS as a side project

Interests: coding, cyber security, gaming, building PCs

REFERENCES

Available on request.

What Digital & IT employers want to see:

- ✓ Any evidence of self-directed learning — online courses, personal projects, certifications
- ✓ Problem-solving examples, even if informal (fixing a relative's laptop, building a website)
- ✓ Communication skills — IT roles involve explaining things to non-technical people
- ✓ Specific tools and systems listed, not just "good with computers"

Common mistakes to avoid:

- ✗ "Good with computers" — say which ones and how
- ✗ Listing no self-study or side projects — free certifications exist and take days, not months
- ✗ Ignoring soft skills — IT support is a people job as much as a technical one
- ✗ Vague interests like "I like technology" — be specific about what you build, play, or explore

Universal CV tips — applies to every sector:

Length: one page until you have 2+ years of experience.

Format: save and send as a PDF — never a Word doc.

Email address: use firstname.lastname@gmail.com — not nicknames.

Tailor it: adjust your personal statement for every application.

Proofread: read it backwards. Get someone else to read it too.
